The Urban Trend Reverso Plus Measuring Cup and Spoon Set is one of the most unique measuring tools. On one side of the tool is a measuring cup that holds two full cups, and on the bottom side is a removable measuring spoon set. A helpful pouring spout makes transferring ingredients simple.

The liquid measuring cup in the set is accurate and easy to use. I love that it can hold two cups instead of the standard one cup. It also has a great pouring spout that makes transferring ingredients simple. The different measurements are indicated in the center of the cup. I love that it denotes the 1/4 and 1/3 measurements for each cup, eliminating any guesswork or need for additional measuring cups. As you pour ingredients, the measurements stay easy to read, unlike some other cups I have used.

Reverse the measuring cup and you will find a hidden set of measuring spoons. Rarely, when baking or cooking do you need just one or the other. This tool gives you both measuring cups and spoons all in one hard to lose set. The spoons are snapped into place to avoid misplacing. They quickly snap off and allow you to measure from 1/4 teaspoon to 1 tablespoon.

This Measuring Cup and Spoon Set is both innovative and practical. It makes a great starter set for new apartment and it will make finding all of your tools every time you go to cook much easier!
